Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species I in the reply filed on February 23, 2006 is acknowledged. The traversal is on the ground(s) that claims 65 and 69 should be included in Species I. This is not found persuasive because claim 65 including limitations that is distinct from the limitations of claims in Species I. For example, claim 65 recites the transmitting apparatus to manage the receiving apparatus identifiers, while the Species I is for transmitting apparatus to transmit a storage identifier. Similarly, Claim 69 is also distinct from the Species I because it recites the transmitting apparatus to transmit a receiving apparatus identifier that identifies at least one receiving apparatus.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 53-55, 57, 58, 60-65, 69 and 70 drawn to an invention nonelected with traverse in Paper filed on February 23, 2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2614

4. Claims 2, 4,, 56, 59 and 66-68 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawai (U.S. Patent No. 6,792,245).

Regarding claim 2, Kawai teaches a transmitting apparatus (Fig. 1, 11) that transmits a storage identifier (ID codes) that identifies one of a plurality of storage media and data (column 6, lines 1-67).

Regarding claim 4, Kawai teach a transmitting method, comprising:
transmitting a storage identifier (ID codes) that identifies one storage medium of a plurality of kinds of storage media and data to be accumulated on at least one storage medium identified by the storage identifier (column 6, lines 1-67).

Regarding claim 56, Kawai teach a transmitting apparatus that transmits a storage identifier (ID codes) that identifies a kind of storage medium, and data (column 6, lines 1-67).

Regarding claim 59, Kawai teach a transmitting method, comprising:
transmitting a storage identifier that identifies a kind of storage medium, and data to be accumulated on the kind of storage medium identified by the storage identifier (column 6, lines 1-67).

Regarding claim 66, Kawai further teach the transmitting method comprising associating at least one storage identifier with at least one of content and a kind of content (it is noted that the prestored information associated with ID code is inherently comprising a content and a kind of content).

Regarding claim 67, it is noted that users of receiving apparatus can make a selection what information to be transmitted (column 10, lines 47-61).

Regarding claim 68, see column 11, line 51 to column 12, line 24.

Art Unit: 2614

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nishimura et al. (U.S. Patent No. 6,834,111) teach data transmitting/receiving method, data transmitter, data receiver, data transmitting/receiving system, AV content transmitting method, AV content receiving method, AV content transmitter, AV content receiver, and program recording medium.
